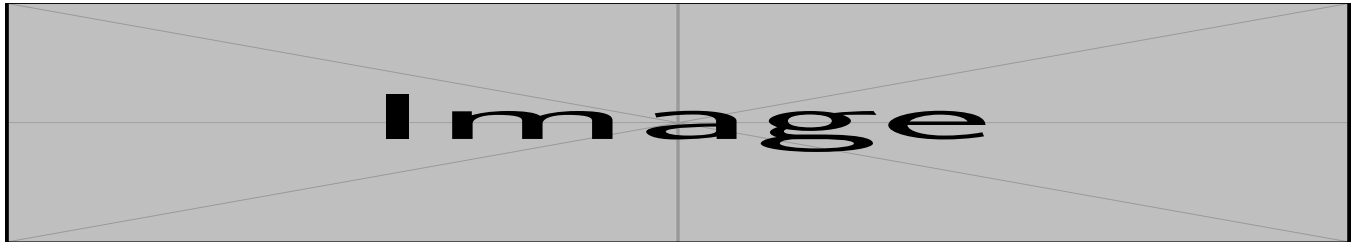

Figure 1: A teaser figure.

Abstract

This is an abstract

1 Introduction

This is the introduction section. A nice teaser figure is shown in Figure 1. A nice reference on this one is [1].

2 An interesting section

This is the content of the interesting section. Here is an interesting equation:

$$E = mc^2 \quad (1)$$

Einstein's famous equation is shown in (1).

3 Another interesting section

This is the content of another interesting section. In 2 we discussed the previous interesting section. Now, we build upon that discussion to explore further insights, referencing Einstein's famous equation (1).

An important figure is shown in Figure 2. It is crucial to reference all figures appropriately in the text.

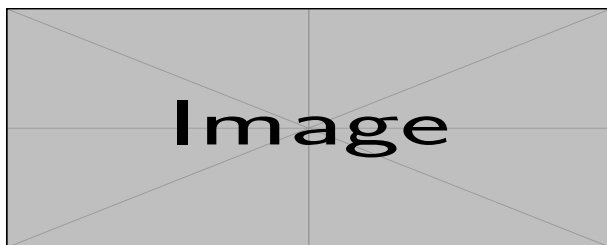

Figure 2: An important figure. Change the 0.45 width but always less than 0.5. You can change figure to figure* if needed to have a two-column figure.

4 Conclusions

This is the conclusion section where we summarize the key findings and contributions of our work.

5 Acknowledgements

The work was partially funded by a great EU-funded project.
